DISTANCE-DIGITAL TEACHING AND LEARNING IN THE POST-COVID-19 ERA

DISTANCE LEARNING GLOSSARY
- developed!

As a part of Di2Learn project **Intellectual Output (IO2) - Triple first aid DI2LEARN Toolkit**, Distance Learning Glossary has been developed by Partners in the period January – February 2022 as a first part of result 2.
It is innovative tool which was developed to support teachers-schools to organize, manage, monitor and evaluate distance learning activities. It explains, presents, and clarifies terms – concepts (a total of 131) which have been widely used in the Covid-19 period as a result of the sudden shift to distance and online learning.
The project consortium produced **two versions of the Glossary:**

- version in which terms are arranged within specific, appropriate categories related to digital learning and
- version in which all 131 terms are arranged in alphabetical order

The glossary has been translated into all partner languages and has been revised by primary and secondary school teachers.
During February, **2nd press release** has been published in all Partner countries, and IO1 evaluation has been made.
